THE RELENTLESS PURSUIT OF PERFECTION.

Riding pleasure starts long before you get onto your motorcycle. It starts with total peace of mind. Because when you know your safety is taken care of, you're free to enjoy the buzz of anticipation whenever you suit up for the next journey. That's why BMW Motorrad created the C.A.R.E. stamp of approval. C.A.R.E. stands for Concept of Advanced Rider Equipment, and represents the unwavering commitment to **safety, innovation, comfort** and **quality** that goes into designing every item of BMW Motorrad rider equipment.

Each product is years in the making. Whether we're talking about the new, hard-wearing materials developed by a dedicated R&D team, the sophisticated design elements that increase both protection and comfort, or the testing methods devised and employed in-house, the highest standards are applied from start to finish. This relentless pursuit of perfection allows BMW Motorrad to ensure that its products meet standards far more stringent than CE and EU norms. Only then will they receive the C.A.R.E. stamp of approval.

We want you to enjoy riding your motorcycle – and that doesn't just mean meeting standards. It means surpassing them, in everything we do.

Find out more at bmw-motorrad.com/care

SAFETY

Safety is the number one priority when out on the road. And this doesn't just apply to the bike itself – it means having the right protective clothing, too. When riders take to the tarmac, they're completely exposed, and there's a lot going on around them. They need to be prepared for anything that comes their way. That's why safety is one of four C.A.R.E. criteria, and central to the development of our rider equipment. Every last detail is subject to intense scrutiny to ensure comprehensive protection.

We take great care in ensuring that our products are compatible with one another. Whether you go for a BMW Motorrad jacket, trousers and helmet, or combine several other products, each item must function as part of a single protective unit that leaves no part of the body vulnerable.

On all of our trousers, jackets and suits, those areas most at risk in the event of an accident are reinforced, double stitched and fitted with state-of-the-art CE protectors. This ensures the garments can withstand all the usual stresses and strains of day-to-day riding, and even the hardest impacts on asphalt and gravel, without sacrificing freedom of movement.

The materials and treatments, the manufacturing techniques, and every test at every stage all reflect the pursuit of one goal: to provide riders with the highest level of active and passive safety and the most enjoyable ride possible. After all, at BMW Motorrad, safety is about providing total peace of mind.

INNOVATION

Innovation has been at the heart of BMW Motorrad since it was established in 1923. We've also led the way in the development of rider equipment since the mid-seventies. We've invested years of research, development and testing to create solutions that meet a wide-ranging set of requirements for motorcycling clothing – with the aim of making the best even better.

Our ground-breaking BMW climate membrane technologies are prime examples of this. The membrane breathes in summer to keep riders cool, while locking in warmth on colder days. It also offers a waterproof rating of 10,000 mm.

Combining unprecedented damping properties with maximum comfort, our NP and NP2 protectors are prime examples of why BMW Motorrad rider equipment is at the forefront of innovation. Our Neck Brace system is also a landmark achievement: BMW Motorrad is the first manufacturer to significantly reduce the risk of damage to the neck area without affecting freedom of movement.

C.A.R.E. is more than just a seal of approval – it's a promise to our customers that we're constantly breaking new ground to deliver safer, higher-quality and more comfortable products.

COMFORT

Just like safety, comfort is a crucial factor in the development of rider equipment. Ultimately, it's about providing maximum passive protection while ensuring riders are unaware of and not distracted by any of the garments they are wearing. Whatever the weather conditions, and however hot or cold it may be, anything less than total comfort might diminish their ability to react. That's why BMW Motorrad clothing includes the latest ventilation and membrane technologies. It's also why we design our helmets to keep wind noise to a minimum.

Not only do our products look and feel great, they're also supremely functional. We strive to set new standards in everything we do. Whether it's the collar, the sleeves or the cuffs – we're meticulous about every part of every garment, no matter how big or small.

QUALITY

At BMW Motorrad, we know that raising the bar means going to great lengths. That's why we put our products through mile after mile of testing to identify and eliminate any potential weaknesses. Every item in the BMW Motorrad rider equipment range is designed and built to endure the countless miles riders cover.

There are no legal requirements for quality and durability, so we decided to create our own standard with its own set of criteria. And this is something we're taking very seriously. In our dedicated laboratory, every item of BMW Motorrad rider equipment is tested down to the last detail to ensure incomparable quality – and this includes the development processes and the materials used to make them.

We shake, scrape and smash practically everything within our reach in our test facilities. As a result, you're unlikely to find the same level of quality anywhere else.

C.A.R.E. STANDARDS – HOW THEY MEASURE UP

SAFETY

CATEGORY	INDUSTRY STANDARD	C.A.R.E. STANDARD
Impact absorption	There is no legal requirement for specially fitted left and right-hand protectors.	BMW Motorrad offers left and right-hand protectors that can be adapted to the rider's specific shape. It offers excellent impact absorption performance and has won countless consumer awards.
Tear resistance	Materials must be able to withstand a minimum force of 100 N/cm ² . (DIN EN ISO 13937-2:2000; tear resistance*)	The materials we use must be able to resist a force of at least 1000 N/cm ² .
Abrasion resistance	In standard industry testing, materials are exposed solely to an abrasive belt running at approx. 29 km/h. (DIN EN ISO 13595; abrasion resistance*)	The BMW testing institute simulates the impact, fall and slide of a 75-kg rider on motorway tarmac, at speeds of up to 120 km/h.
Helmet aerodynamics/aeroacoustics	Helmets are tested individually for aerodynamic and aeroacoustic performance, without the rider or motorcycle.	We analyse the aerodynamics and aeroacoustics for the helmet, rider and motorcycle together, over 20 hours of wind tunnel testing.
Helmet angles of sight	Standard regulations do not call for helmets to offer an expanded (and thus safer) field of vision.	By offering angles of sight that go beyond industry norms, our helmets provide a wider field of vision, particularly laterally.

INNOVATION

CATEGORY	INDUSTRY STANDARD	C.A.R.E. STANDARD
Water resistance	According to DIN standards, fabric with a water head of 1,300 mm is considered waterproof. (DIN EN 20811:1992; water resistance*)	The BMW climate membrane offers a 10,000-mm head of water, while also being incredibly breathable.
Practicality	Legal requirements do not call for motorcycle clothing to be tested in use at all.	BMW Motorrad test riders assess the functionality of every item we produce over numerous rides (including endurance testing) in a range of weather conditions.
Helmet water resistance	There is no legal requirement to integrate seals within the structure of helmets. If desired, manufacturers can simply apply seals using adhesive.	Our innovative seals are built in to the structure of our helmets, and are not glued on. This ensures peerless protection and water resistance in even the toughest conditions.
Helmet angle of removal	By law, the maximum angle of removal permitted for helmets is 30 degrees (ECE 22.05 roll-off test*)	BMW Motorrad enduro helmets, for example, offer an angle of removal of no more than 15 degrees, thanks to their innovative neck straps.

* correct as of October 2013

COMFORT

CATEGORY	INDUSTRY STANDARD	C.A.R.E. STANDARD
Fit and ergonomics	In general, only standardized sizes are available. (DIN EN ISO 340*)	The sizes we offer are based entirely on the dimensions measured and supplied to us by our customers.
Height-adjustable protectors	There is no legislation that requires knee protectors to be height-adjustable.	Our protectors are height-adjustable as standard, ensuring the perfect fit for each rider.
Helmet ventilation	Standard helmets offer ventilation around the upper part of the head only.	BMW Motorrad helmets are designed to allow air to circulate around the entire head.

QUALITY

As there are no legal requirements for quality, we are using the appropriate DIN EN ISO standards as a basis. BMW Motorrad requirements dictate that at least 5 of the 7 criteria should be met.

CATEGORY	INDUSTRY STANDARD	C.A.R.E. STANDARD
Resistance to fading	No industry standard.	Garmets are spread out under xenon light to test their resistance to fading. (Taken from DIN EN ISO 105-B02:2002; resistance to fading*)
Rub fastness	No industry standard.	Each material is placed alongside a wet or dry testing fabric, then rubbed together. The rub fastness is assessed based on the colouring of the test fabric. (Taken from DIN EN ISO 105-X12:2002; rub fastness*)
Colour fastness to perspiration	No industry standard.	Textiles are placed alongside a testing fabric soaked in sweat, and then rubbed together. (Taken from DIN EN ISO 105-E04:2013; fastness to perspiration*)
Oil repellency	No industry standard.	Materials are tested for their resistance to oil, in the same way as the colour fastness analysis. (Taken from DIN EN ISO 105-X12:2002; rub fastness*)
Fastener abrasion resistance	No industry standard.	Textiles are subjected to the Martindale abrasion test, at a force of 9kPa over 4,000 cycles, to assess their resistance to wearing. (VDA 230-210:2008, taken from DIN EN 530:2013; fastener abrasion resistance*)
Abrasion resistance	No industry standard.	Each material is rubbed against a standardized piece of test fabric over 30,000 cycles. (Taken from DIN EN ISO 12947-2:2007; wear resistance*)
Washing fastness	No industry standard.	Textiles are sewn into a piece of test fabric, then placed in a beaker full of detergent solution and agitated. The test fabric is then dried, and the colouring assessed. (Taken from DIN EN ISO 105-C06:2010; textile washing fastness*)
Helmet UV and impact resistance	No industry standard.	Our paint systems are subjected to strict testing to ensure they maintain their appearance and performance over time.
Helmet chin section wear	No industry standard.	In fatigue testing, the opening and closing of the visor and chin section is repeated over and over again. This ensures the helmet functions correctly throughout the entire life cycle.

HELMETS

Colour: Brilliant White

System 6 EVO helmet

- Flip-front helmet with quadruple-joint mechanism
- Outer shell made of glass-fibre reinforced plastic, two sizes available
- EPS inner shell made up of several sections
- Double-glazed visor with anti-scratch coating on outer face
- Excellent head and visor ventilation
- Outstanding aerodynamics and aeroacoustics
- Built-in drop-down sun visor, operated via slide control
- Central release button to open the chin guard
- Very wide field of vision
- Chin strap with snap lock
- Neck straps prevent the helmet from twisting in the event of an impact
- Removable, washable lining made of DuPont Coolmax®
- Neck and cheek pads available in a range of sizes to ensure optimum fit
- Compatible with BMW Motorrad communication system
- Complies with ECE 22-05
- Weight approx. 1,595 grams (small helmet)
- Sizes: 48/49–64/65

AirFlow 2 helmet

- Premium jet helmet with excellent ventilation
- Outer shell made of glass-fibre reinforced plastic, three sizes available
- EPS inner shell made up of several sections
- Inner three-dimensionally curved visor, with anti-scratch coating on both sides (class 2 optical quality)
- Two large ventilation vents can be closed via slide control to keep out rain
- Outstanding aerodynamics and aeroacoustics
- Chin strap with snap lock
- Integrated neck straps prevent the helmet from twisting in the event of an impact
- Washable liner
- High-quality aluminium elements with BMW branding
- Compatible with communication systems
- Complies with ECE 22-05
- Weight approx. 1,170/1,280/1,380 grams
- Sizes: 52/53–62/63

Sport helmet

- Integral helmet with dynamic design
- Outer shell made of glass-fibre reinforced plastic, two sizes available
- EPS inner shell made up of several sections
- Double-glazed visor; outer visor has anti-scratch coating on both sides
- Head ventilation adjustable by slide control, visor ventilation by rocker
- Lining made of washable, moisture-wicking Hydroplus
- Chin strap with snap lock
- Neck straps prevent the helmet from twisting in the event of an impact
- Visor is easily replaced
- Compatible with BMW Motorrad communication system
- Speed, Magma and Sparc colour schemes available only as limited editions
- Complies with ECE 22-05
- Weight approx. 1,380 grams
- Sizes: 52/53–62/63

Race helmet

- Integral helmet, suitable for road and track use
- Glass-fibre/carbon-fibre outer shell in two sizes
- EPS inner shell made up of several sections
- Large spoiler for maximum stability at speeds of over 300 km/h
- Visor with wide field of vision, two-dimensionally curved, with anti-scratch coating on both sides
- Anti-fog inner visor
- Effective visor and head ventilation
- Visor lock button at the side
- Neck contour ensures wearer comfort even when in the prone riding position
- Double-D fastener
- Neck straps prevent the helmet from twisting in the event of an impact
- Removable and washable liner
- Supplied with clear visor, and one set of tear-offs
- Complies with ECE 22-05
- Weight approx. 1,350 grams (small helmet)
- Sizes: 52/53–62/63

For helmets to deliver maximum safety, they must combine a number of different functions. As expected, the Race helmet is exceptional when it comes to impact absorption. In addition though, it enables riders to concentrate fully on the road ahead, and to react at lightning speed.

Enduro helmet

- Enduro sport helmet
- Outer shell made from glass fibre, with carbon and Kevlar, three sizes available
- EPS inner shell made up of several sections for optimum shock absorption
- Injection-moulded, three-dimensionally curved visor with anti-scratch and anti-fog coating
- Liner made of DuPont Coolmax and Alcantara
- Washable head and cheek pads
- Removable draft excluder for improved ventilation
- Chin strap with double-D fastener
- Neck straps prevent the helmet from twisting in the event of an impact
- Peak and/or visor can be removed and replaced in seconds
- Complies with ECE 22-05
- Weight approx. 1,380 grams (approx. 1,270 grams without visor)
- Sizes: 53/54–63/64

This helmet satisfies all the requirements of an enduro sport helmet from BMW Motorrad. Along with optimum fit, it delivers excellent aerodynamics and of course maximum safety for the rider. Optional accessories: lining and cheek pads in a range of sizes, tinted visor.

Legend helmet

- Retro-style jet helmet
- Outer shell made of glass-fibre reinforced plastic
- EPS inner shell made up of several sections
- Short sun shield, no visor
- High-quality inner with genuine leather and embroidered BMW Logo
- Washable liner with mesh for superior ventilation
- Removable, washable head and cheek pads
- Matt chrome edging
- Chin strap with double-D fastener
- Integrated, padded neck straps prevent the helmet from twisting in the event of an impact
- Complies with ECE 22-05
- Weight approx. 1,050 grams
- Sizes: XS–54, S–56, M–58, L–59, XL–61

With classic styling, high-quality leather, and no visor, the new, uncompromising Legend helmet means business. There's no doubting its safety performance either, thanks to first-rate impact absorption and integrated neck straps. Matching goggles and an optional sun shield complete the timeless look.

Colour: Blackstorm Metallic

Colour: Alpine White

Legend goggles

The goggle strap holder is made of genuine leather, and is embossed with the BMW logo. The goggles feature clear lenses, with tinted lenses available as an option.

SUITS

NEW

Long jacket and trousers, men's cut, Black

NEW

Long jacket, women's cut, Black

StreetGuard suit

- Professional-grade touring suit for year-round use
- Short or long jacket with adjustable waist
- 3-Perform material: abrasion-resistant, elasticated three-layer laminate
- Double-thickness ProtectionGuard material in vulnerable areas
- Removable NP2 protectors at shoulders, elbows, back, hips and knees (adjustable to three different heights)
- Coccyx protector retrofittable
- Waterproof, windproof and incredibly breathable, thanks to the BMW Intelligent climate membrane
- Removable storm collar with integrated storm hood
- Removable thermal insert for trousers and windproof thermal inner jacket with excellent insulation; can also be worn separately
- Steplessly adjustable trouser waist
- Zip-up bib and adjustable braces on men's trousers
- Zip-up raised waistband with anti-slip effect on women's trousers
- Ventilation zippers on jacket and trousers
- Waterproof jacket and trouser pockets, and sophisticated pocket for multimedia devices
- Reflective print on front, back and trouser legs
- Connector zip: 40 cm (all-around)
- Comfort fit
- Colours: short jacket in Anthracite or Anthracite/Red, long jacket in Black, trousers in Black
- Sizes (women): 34–48, 72–88, 18–22 (Anthracite/Red 34–48 only)
- Sizes (men): 46–66, 98–118, 25–32 (Anthracite/Red 46–60 only)

Whatever your ride has in store, the new StreetGuard will be ready. Equipped to tackle every weather condition and road surface, it features elasticated 3-Perform material and removable NP2 protectors, setting new standards in safety and rider comfort. Waterproof, windproof and incredibly breathable, this genuine all-rounder is available in three eye-catching designs, with either a short or long jacket.

The removable storm collar with integrated storm hood keeps the wind and rain reliably at bay.

Providing fit, support and ventilation: with zip-up bib, stretch zones at the side and adjustable braces, the men's trousers are more comfortable than ever.

Cover jacket

AirFlow suit

- Two-part summer suit for warm weather
- Abrasion-resistant Dynatec outer
- Removable NP2 protectors at shoulders, elbows, back, hips and knees (height adjustable)
- Stretch Dynatec on the upper back for maximum freedom of movement
- AirTex mesh inserts for improved ventilation
- Eyelet functional lining is extremely air permeable and elasticated
- Includes windproof cover jacket to wear over top in cooler weather
- Reflective material on the jacket and trousers
- Coldblack finish on Black suit prevents overheating
- Soft material on the collar, sleeve seams and trouser waistband
- Velcro fasteners to adjust width of trouser waistband, sleeve cuffs, and trouser cuffs, and waist of the women's jacket
- Two built-in carry straps mean jacket can also be worn as rucksack
- Two side jacket pockets, one back pocket, three inner pockets, two trouser pockets
- Waterproof pouch
- Connector zip: all around or 40 cm
- Regular fit, women's fit and men's fit
- Colours: jacket and trousers in Black or jacket in Grey/Red with trousers in Grey
- Sizes (women): 34-48
- Sizes (men), Black: 46-66, 98-118, trousers also in 25-28 (Grey/Red 46-60 only)

NEW

NEW

Women's cut, Grey/Red
Men's sizes also available.

Even on the hottest summer days, the AirFlow summer suit will keep you cool and fresh. Stretch and mesh inserts in the abrasion-resistant outer provide excellent ventilation and freedom of movement. The black suit comes with an intelligent coldblack® finish, to prevent the build-up of heat.

Practical: upon arrival, the jacket can easily be carried as a rucksack.

A waterproof pouch protects mobile phones and wallets from moisture.

If not in use, the windproof outer jacket can be easily stowed in the back pocket.

GS Dry suit

- Entry-level enduro suit, suitable for touring
- NP2 protectors at shoulders, elbows, back, hips and knees (height adjustable)
- Material reinforced in vulnerable areas
- Cordura 500 outer with breathable coating
- Windproof and waterproof thanks to BMW climate membrane
- Leather trim on the inside of the knees
- Ventilation zips on the chest and back
- Air mesh lining in back for improved circulation
- Stretch inserts for comfortable fit
- Reflective print and stowable reflective flaps
- Colours (women): Black/Anthracite, Grey/Red
- Colours (men): Grey/Black, Anthracite/Yellow/White
- Sizes (women): 34–46 and 17–22 (Black/Anthracite only)
- Sizes (men): 46–60 and 98–110 (Grey/Black only)

The combination of safety, functionality and comfort make the Rallye suit a must for enduro riders who need gear they can rely on, whatever the weather.

Rallye suit

- Specially developed for off-road riding
- Cordura outer, optimized by BMW Motorrad
- NP2 protectors at shoulders, elbows, back, hips and knees (height adjustable)
- Removable, breathable, wind and waterproof BMW climate membrane with Comfort Mapping
- Jacket with removable sleeves
- Trousers with stretch inserts and leather trims
- Stretchable, breathable mesh lining
- Silicon strip on climate membrane seam prevents jacket from riding up
- Multiple ventilation and adjustment options on the waist, seams and sleeves
- Reflective material
- Pocket in back for TrinkPak drinking system
- Two waterproof pockets on the outside of the jacket
- Connector zip (40 cm)
- Colours and sizes: Blue/Grey (46–66, 98–118, trousers 24–27), Grey/Red (46–60)

With its unique Z-liner ventilation system, first-rate protection, and reflective print that meets international standards, the GS Dry suit keeps riders dry and comfortable on trails and roads around the world.

Atlantis suit

- All-weather touring suit made of hydrophobic 1.2–1.4-mm nubuck cowhide leather
- Naturally breathable leather regulates body temperature and moisture extremely effectively
- Removable NP protectors at shoulders, elbows, hips and knees (height adjustable)
- NP2 back protector
- Coccyx protector retrofittable
- Adjustable waist, sleeves and trouser cuffs
- Stretch zones for enhanced comfort
- Reflective strips on shoulders
- Connector zip (all-around)
- Colour: Anthracite
- Sizes (women): 36–46
- Sizes (men): 46–66, 98–118, 25–32

Material information: hydrophobic leather

Hydrophobic leather is specially treated to repel water. At BMW Motorrad, it is treated in the drum, using a premium product (3M Scotchgard). During this process, only the leather fibres are coated, to ensure the pores stay open and the leather remains breathable.

DoubleR suit

- Body-hugging one-piece race suit in BMW Motorrad motorsport design
- Highly abrasion-resistant kangaroo leather, approx. 1.0 mm thick
- NP protectors for shoulders, elbows, hips, knees and back
- Hump with zipper for integration of the BMW Motorrad Neck Brace system
- Plastic-covered INOX stainless steel slider at shoulders and elbows
- Rigid plastic sliders at the knees
- Generous Dynatec stretch inserts and stretch leather
- Black leather with TFL cool technology to reflect the sun's heat on hot days
- Perforated areas at chest, back and arms to keep body cool
- Includes windblocker bodywarmer
- Colours: Blue/White/Red, Black/White/Red
- Sizes: 46–56, 98–110

DoubleR Skin undersuit

For product information, see page 67

Complete solution: the package includes a windblocker undershirt for low-temperature riding, and a handy tote bag, featuring carry straps and a display window.

Women's cut, Black/Red

This leather suit is the perfect introduction to the world of motorsport. 100% cowhide nappa leather, stitched-in protectors, and a number of leather and aramid stretch inserts ensure a streamlined, comfortable fit. As such, it is ideal for short trips and longer tours alike.

Men's cut, Black/Grey

Men's cut, Black/Blue

Start suit

- Sporty leather two-part suit
- 100% cowhide nappa leather (1.2 mm)
- Removable NP protectors on back and hips
- NP protectors stitched in at shoulders, elbows, and knees
- Leather stretch inserts for maximum comfort
- Aramid stretch inserts on arms and legs
- Seams are double-stitched or flat seams
- Special women's cut; trousers have additional leather stretch inserts at the hips
- Integrated, shock-absorbing material at collarbone
- Retrofittable hard plastic knee sliders
- Connector zip

JACKETS / TROUSERS

Urban jacket

- Waterproof jacket with classic design
- Wear-resistant polyamide/polyester mix
- NP protectors at shoulders and elbows
- NP Air back protector can be retrofitted
- Windproof, waterproof and breathable, with BMW climate membrane lining laminate
- Padded, removable thermal collar
- Zip at cuffs and collar with magnet to adjust fit
- Two high-quality waterproof outer pockets, one waterproof inner pocket, each zipped
- Reflective Anthracite print on sleeves
- Connector zip (40 cm)
- Colour: Black
- Sizes (unisex): S-3XL

Venting jacket

- Textile motorcycling jacket for extreme summer temperatures
- Abrasion-resistant Cordura mesh and elastic Dynatec
- Removable SC protectors at shoulders and elbows
- Removable NP Air back protector
- Large, air-permeable mesh material for optimal ventilation
- One breast pocket, two side pockets, each with zip
- Reflective strips at the front and back for maximum visibility
- Connector zip (40 cm)
- Fitted women's jacket, straight-cut men's jacket
- Colour: Black
- Sizes (women): XS-XL
- Sizes (men): S-3XL

Boulder jacket

- Short sport-style jacket for the urban environment
- Removable NPL protectors for shoulders, elbows and back
- Abrasion-resistant polyamide/cotton mix with waterproof wax finish
- Breathable, windproof and waterproof; removable insert with BMW climate membrane
- Adjustable at collar, sleeves and waist
- Two side pockets, one breast and one sleeve pocket, plus one waterproof pocket in insert
- Reflective material around the shoulders
- Connector zip (40 cm)
- Regular fit
- Colour: Anthracite
- Sizes (men): 46-60

NEW

Whether in the city or the country, and in summer, autumn or spring, whenever you need a light jacket, look no further than the Boulder. If the weather should take a turn for the worse, its removable insert also provides effective protection against wind and rain.

NeonShell jacket

- Short, modern, sport-style jacket in a stylish combination of materials
- Removable NPL protectors for shoulders, elbows and back
- Abrasion-resistant, colour-fast neon yellow material made of a polyamide/polyester mix
- Cordura/cotton mix base material; abrasion resistant and waterproof
- Removable thermal insert with BMW climate membrane; breathable, wind and waterproof
- Adjustable at collar, sleeves and waist
- Two zipped pockets, two breast pockets, and one waterproof inside pocket
- Reflective print on sleeves and neck
- Connector zip (40 cm)
- Regular fit; men's and women's sizes
- Colour: Dark Grey/Neon Yellow
- Sizes (women): 34-48
- Sizes (men): 46-60

NEW

Women's cut

- Regular fit; men's and women's sizes
- Colour: Neon Yellow/Grey
- Sizes (women): 34-48
- Sizes (men): 46-60

NEW

Women's cut

NEW

Men's cut

See and be seen – this contemporary motorcycling jacket combines excellent visibility with laid-back urban styling. New NPL protectors and a modern mix of materials ensure effective protection in city traffic. Neon yellow on the sleeves, front and back maximizes passive safety. In addition, the colours maintain their brightness over the long term.

NEW

Men's cut

Keep things light and airy at the height of summer, and then warm and dry in spring and autumn: this lightweight jacket is incredibly versatile and is ideal for city traffic with its neon colouring. The bright yellow material is a combination of two fabrics – polyamide provides excellent abrasion resistance, while polyester prevents discolouration.

Women's Club leather jacket

- A short-cut motorcycling and casual leather jacket made of soft cowhide (1–1.2 mm thick)
- Very light SC protectors at shoulders and elbows
- NP ProAir back protector can be retrofitted
- Figure-hugging cut, with zipped hip adjusters
- Three outer pockets, two zipped inner pockets
- Lined throughout
- Connector zip (40 cm)
- Colour: Black
- Sizes : XS–L

- Short jacket, cut straight below the waist
- Two side pockets, one breast pocket, two inner pockets
- High-quality metal zips
- Stud fasteners for adjustment of collar and waist
- Connector zip (40 cm)
- Zip in lining for customization with badges
- Regular fit
- Colour: Black
- Sizes (men): 46–60

NEW

NEW

Laid-back style and effective protection don't have to be mutually exclusive. The fashionable BlackLeather jacket – with its abrasion and tear-resistant outer and protectors as standard – offers all the protection you need for safe motorcycling, and ensures that wherever you go, you'll always look the part.

These waterproof textile trousers more than live up to their name. Whether spring, summer or autumn, the functional materials, adjustable waist, adjustable leg cuffs, and a host of other details make them a byword for comfort. They also pair stylishly and effectively with every jacket in the BMW Motorrad range.

Allround trousers

- Textile motorcycling trousers, ideal for spring, summer and autumn
- Removable SC protectors at knees (two height positions) and hips
- Double-thickness material at the knees and seat
- Dynatec with breathable coating
- Windproof, waterproof and breathable, thanks to BMW climate membrane
- Reflective print on lower side seam
- Width adjustable at waist and bottom
- Two waterproof zip pockets at the side
- Soft shell stretch insert in trouser waistband
- Can be teamed with any BMW Motorrad jacket
- Connector zip (40 cm)
- Colour: Black
- Sizes (women): XS–2XL
- Sizes (men): S–3XL

Summer trousers

- Functional summer motorcycling trousers
- Abrasion-resistant material with high cotton content
- Double-thickness material at the knees and seat
- Removable SC protectors at knees (height-adjustable) and hips
- Trouser bottoms detachable at knee with zip
- Two insert pockets, one pocket in the seat (each zipped)
- Two cargo pockets at sides with stud fasteners
- Woven belt with BMW Motorrad branding on the buckle
- Width adjustable at bottom
- Connector zip (40 cm)
- Colour: Anthracite (new) or Sahara
- Sizes (unisex): XS–3XL

Colour: Sahara

NEW

Colour: Anthracite

FUNCTIONAL CLOTHING

NEW

HighViz vest

- Bright yellow vest made of air-permeable polyester
- Large reflective panels on the chest, back and sides
- Excellent visibility in all weather conditions
- Elasticated polyamide and elastane inserts on both sides
- Close, flutter-free fit
- Can be worn with all BMW Motorrad jackets
- EN 1150 certification
- Sizes (unisex): XS–4XL

CoolDown vest

- A cooling vest with HyperKewl functional fabric at the back and front
- Constant cooling effect through evaporation
- Outer: nylon and polyester functional fibre
- Stretchy side sections
- Front zip
- Colour: Black
- Sizes (unisex): XS–2XL

This revolutionary functional vest uses evaporation to cool the wearer. When water is applied, the HyperKewl system locks in the moisture and stores it for up to eight hours, reducing heat by 6 to 12°C compared to the ambient temperature. At the same time, clothing stays perfectly dry.

HeatUp vest

- Warming polyester vest with slim-cut fit
- Breathable, moisture-wicking and windproof
- Five heating elements located in the chest, back and kidney areas
- Three heating levels, max. 35W at 12V
- Plugs into on-board socket
- Lightweight fleece lining for optimum insulation
- High, insulating collar
- One inside pocket
- Colour: Black
- Sizes (unisex): XS–3XL

NEW

This lightweight, sport-style vest fits beneath all BMW Motorrad jackets, and keeps the wearer warm in cool weather. The heating elements are positioned according to the specific needs of motorcycling, while the vest's settings can be adjusted via the optional controller. Please note the controller is not supplied as standard, and must be purchased separately.

PCM jacket

- Functional jacket with removable sleeves
- Phase Change Material (schoeller PCM in front and back) actively compensates for differences in temperature, increasing comfort
- Sleeves and side sections made of 100% soft shell; sleeves thinly padded
- Two side pockets with zips and mesh lining
- Colour: Black
- Sizes (unisex): XS–4XL

NEW

PCM 2 functional undersuit

- Two-part undersuit
- High collar made of fleecy thermal Powerstretch
- Outer material is Powerstretch
- Phase Change Material (schoeller PCM) at chest, upper arms, kidneys, upper thighs and knees
- Breathable, temperature-regulating and quick-drying
- Suitable for use in temperatures from 5 to 15°C
- Phase Change Material becomes softer when worn
- Also suitable for skiing, cycling, hiking, etc.
- Colour: Black with contrast Green stitching
- Sizes: S–2XL

Comfortable, practical undergarments are key to an enjoyable riding experience. Functional underwear from BMW Motorrad is made of soft, breathable material, and is anatomically fitted for motorcycling.

Men's cut

Women's cut

BMW Motorrad sunglasses

- Slightly reflective lenses for a stylish look
- Close-fitting, designed for motorcyclists to wear comfortably inside the helmet
- Scratchproof, tinted lenses for optimum protection even in strong sunlight
- Very light in weight
- Metal frame
- 100% UV-A, UV-B and UV-C protection
- With hardcase and softbag for storage

Colour: Tobacco

Colour: Gun

TriVision functional glasses

- Functional glasses with sporty fit
- Replaceable and interchangeable lenses for any weather (tinted, orange and clear)
- 100% UV-A, UV-B and UV-C protection with dark lenses
- Can be worn in perfect comfort inside the helmet
- Supplied complete with soft pouch and sturdy spectacles case

TrinkPak Hydra

- Flexible drinking-water system
- Made of transparent, mould-resistant and odourless polyurethane
- Reservoir with large opening for easy filling and cleaning
- Plug and play connection from tube to reservoir – liquid does not flow until the tube has been connected (nothing wets the jacket during set-up)
- Lid pushes firmly closed, and remains completely watertight even under severe conditions
- Angled mouthpiece with push-pull function for easy opening (including with teeth)
- Soft easy-flow silicon bite-down cap at the end of the mouthpiece: when the mouthpiece is open, biting down lightly on the cap increases the flow of liquid
- Capacity: 2 litres

Care products

- BMW functional detergent: protects functional garments and keeps materials windproof, waterproof and breathable
- BMW waterproofing agent: for fabric and leather; repels water and oil and provides a protective seal
- BMW motorcycle cleaner: cleans all motorcycle components with ease, without harming the bike or the environment
- BMW chain spray: spreads evenly, holds well, and resists rain and extreme temperatures
- BMW visor and helmet cleaner: removes dirt and insect remains effectively, without damaging the equipment
- BMW anti-misting spray: prevents fogging and repairs light scratches
- BMW helmet liner cleaner: removes dirt, deodorizes and refreshes helmet linings

Trouser braces

- Three means of attachment: loops, buttons, clips
- Large leather section at back
- Steplessly adjustable
- Colour: Black

Index »

AirTex

This resistant, net-like Dynafil structure allows air to flow freely, keeping you cool even at higher temperatures. It is extremely light, yet offers all the safety you'd expect from a motorcycling jacket, and is ideal for hot-weather riding.

Azo dyes

These may not be used in coloured outer materials since they can break down into carcinogenic amines.

BMW climate membrane

A functional membrane that meets BMW standards and is breathable, waterproof and windproof.

Breathability

Technically defined as resistance to evaporating heat transfer (RET). The lower the RET, the more permeable the material is to air.

Carbon

Heat-resistant chemical fibre, lighter than glass fibre. Characterized by high strength and rigidity.

CE test mark

The CE (Communauté Européenne) mark indicates that the product complies with European Union safety directives.

coldblack

Treatment for dark material that reflects the sunlight and protects against UV rays, keeping suits cooler for longer.

Cordura 500

Nylon yarn consisting of 100% polyamide. The manufacturing process involves respinning and weaving the cut polyamide fibres. Has a melting point of 210°C.

Design

The characteristics of BMW design include the use of classic shapes and colours. Our guiding principle is "Form follows function".

DuPont Coolmax

DuPont Coolmax consists of hollow fibres which transport humidity to the outside very quickly by capillary action, making the material dry 50% faster than cotton.

Dynafil

A highly tear-resistant polyamide yarn that is even more robust than Cordura 500/700 and resistant to high temperatures.

Dynatec

Fabric made of Dynafil. Tear resistant and extremely robust, with a melting point of 290°C.

Expanding pleats

The upper material is sewn onto the stretch fabric in a corrugated form. This allows the compound to stretch, making the tear-resistant outer material even safer.

Glass-fibre reinforced plastic (GFRP)/ carbon-fibre reinforced plastic (CFRP)

The individual fibres (aramid, carbon, glass fibre) can be mixed in varying proportions as required. By changing the orientation and position of the fibres, different characteristics can be achieved – for example low weight, high strength, high rigidity, low heat expansion and good insulating properties.

GORE-TEX®

A membrane made of Teflon (PTFE/polytetrafluoroethylene). Countless microscopic pores prevent the penetration of large water droplets while allowing the much smaller water vapour molecules to pass through. The branch-like structure of the membrane means that it is also windproof.

GORE-TEX® X-TRAFIT

GORE-TEX® X-TRAFIT is a three-layer structure used in motorcycle gloves. It ensures they stay waterproof, windproof and breathable. The layers are attached to each other with adhesive or are laminated, with the lining affixed to the membrane, and the membrane to the leather. The result is an excellent grip, while the gloves are easy to pull on and off at all times, even when wet.

Hydrophobic treatment

A treatment which renders leather water-resistant. BMW uses the vat immersion technique. During this process, only the leather fibres are coated, to ensure the pores stay open and the leather remains breathable.

HyperKewl system

The HyperKewl water management system absorbs and stores moisture, then gradually releases it via evaporation. This has a cooling effect that reduces temperature by six to 12°C, compared to the ambient temperature. It means the body stays cooler, and is better able to perform in challenging conditions.

Integral helmet

A helmet that encloses the head completely.

Jet helmet

An open-face helmet with no chin guard or visor.

Kangaroo leather

Finer, more closely woven fibres and a tighter structure make this leather even more durable than cowhide.

Keproshield

Highly protective material made of Kevlar, Dynatec and cotton, bonded together with the c_change bionic membrane as a three-layer laminate, and treated with coldblack reflective technology.

Keprotect

A blend of Kevlar and PA fibres which enhances Kevlar's already excellent stretchability and abrasion resistance. Used to reinforce those areas most at risk in a fall, such as the elbows, shoulders, knees and thumbs.

Keratan

The unique Keratan treatment maximizes abrasion resistance, while at the same time increasing flexibility. This is achieved by finishing robust premium leather with an etched diamond structure and adding a synthetic coating.

Laminate

A layered structure of various materials created by thermal adhesion (the adhesive is usually applied in spots), and particularly suited for use with all-weather membranes. Can also take the form of a lining laminate or three-ply laminate, and does not always need to be thermally attached to the outer material.

Leather

Because all leathers are not equal, we only use the very best. We select the finest leathers from cows reared in the EU for our jackets, boots and gloves, with a minimum thickness of at least 1.2 mm for our suits, and often much more. As a result, they offer exceptional abrasion resistance.

Motorcycle-specific fit

This cut takes account of the body's contours in the riding position. The tops of the sleeves are further forwards, the sleeves and legs are angled, and there are numerous other special design details.

Nappa leather

The upper surface of the hide. Smooth and slightly shiny, worked to a soft leather with a fine grain.

Nickel-free accessories

All BMW Motorrad buttons and zips are nickel-free to protect the skin.

Nomex

A heat-resistant material made of fire-retardant aramid fibres.

Nubuck leather

A highly breathable leather with a slightly roughened surface, resulting in a velvety feel.

Off-road helmet

A helmet with a chin guard and sunshield but no visor.

PCP/CP

Pentachlorophenol (PCP) is banned under the German prohibited chemicals order of 14 October 1993, though it may be used in concentrations of up to 5 mg/kg in leather processing.

3-Perform

Abrasion-resistant, three-layer elasticated laminate that is windproof, waterproof and breathable thanks to the BMW climate membrane.

PITTARDS

An English tannery that produces specially treated Cabretta leather, entitled WR-100/WR 100X. The leather absorbs very little water and is resistant to sweat, making it especially suitable for use in gloves. It is particularly soft to the touch, and remains so over the long term.

Schoeller PCM

Derived from space research, this material features special paraffin capsules that allow it to store heat when warm and release it when the temperature drops. This means it can minimize fluctuations in body temperature, keeping the rider comfortable. The material is at its most effective between temperatures of five and 25°C.

Serafil

Highly tear-resistant safety yarn used in all BMW Motorrad motorcycle suits.

Safety, active and passive

Active safety measures are designed to prevent accidents, for example by using reflective material for good visibility. Passive safety features aim to minimize the effects of an accident, for instance by employing impact-resistant protectors and outer materials.

Stormcuff

A sleeve inlay which forms a waterproof closure around the wrist.

TFL Cool System

Cool technology is used in dark leather and fabric garments. Thanks to a special manufacturing process, sunlight is reflected from the dark surface of the leather or fabric in the same way as from a light surface, making the outer material much less likely to overheat.

Z-liner

Here, the membrane is like a lining "suspended" between the outer material and the lining itself.

Symbols »

BMW climate membrane

GORE-TEX®

GORE-TEX® Armacor

A material with excellent tensile strength and abrasion resistance, capable of withstanding extreme temperatures thanks to the combination of Kevlar and Cordura.

Cordura

Dynatec

Keproshield

AirTex

3M Thinsulate

Provides thermal insulation without adding weight or volume.

coldblack/TFL Cool technology

Reflective material

NanoSphere

A treatment to prevent the build-up of dirt and improve washability.

Leather

Kangaroo leather

Stingray leather

Hydrophobic treatment

Sun

Warm weather.

Cold

Cold weather.

Windproof

Waterproof

Waterproof pocket

Special ladies' cut

Removable protectors

Retrofittable protectors

Carbon fibre

Fit

Helmet shell in a range of sizes.

Ventilation

Double-D fastener

Extremely light in weight

Double-glazed visor

Neck strap
